175 total non-consecutive trading days; 35 weeks

Tesseract GRAVITY® strategy - a strategy that applies high level computational math, accounts of diurnal variation, adjusts for circadian rhythm, and stratifies success based on buy vs. sell.

*GRAVITY: Graded Reaction Assessment of Value/Interest/Time/Yield - direct real time computational assessment of trade success (actual and anticipated) during actual trade, where contracts per trade are adjusted while in actual trade. Original opening account balance of \$30,000 not included in P/L information. Suggested account for maximal trade efficiency is \$30,000 and above. We calculate net P/L from gross but subtracting \$4.00 RT all in trade costs.
